My family abandoned me because I gave birth to a girl child. Cows were my only source of income, which helped me to feed my daughter and take care of my family needs. I lost my cows during the flood; I was helpless as I was relocated to a safer place. My happiness turned into sorrows within a day, every little hopes I had about my future was shattered into pieces. While I was just waiting upon the Lord, a team came to our village and they distributed flood reliefs. it was very useful and I am so thankful for their help. I shared my problems to the team asking them if they could help me with a cow, the team took it to their notice and prayed for me. later they came and gave me a cow. The cow was pregnant, an added blessing for us. I have no words to express my gratitude towards the organisation for their support in my life. Today my life has become much better and I am selling cow urine to earn a living for my family. I am also glad to share that my daughter has joined her school and she is very thankful. May God bless you thousand folds.

Thinking of that day, it brings so much of fear in my heart. I was sleeping that night, I heard a strange noise and got up from my bed and saw water up to my knee. I immediately rushed to see my cows, there was more water outside. The water levels were rising up. And I couldn't do much to save my cows. My neighbours grabbed my hands and took me to a safer place. In a fraction of seconds, my whole village was surrounded by waters. Cows were my only source of income. losing them was my biggest pain. A team of volunteers came to our village and distributed flood reliefs. I am so thankful; I also shared my problems to the team. The songs and the sermon touched my heart, and I felt peace to press on. Later to my surprise they came and gave me a cow. I was speechless and I was touched by their generous support. I hugged the cow, the cow looked very beautiful. Toady my life is blessed and I am able to earn a living through grazing my cow. Thanks to the organisation from the bottom of heart.

I completely depended on my cows for income source. My husband died in an accident, since then I have been looking after my children. I suffered to even buy milk packets for my children. So, I borrowed money to buy cows. The flood took away my cows. Soon after when everything gets settled, the money lenders will come asking for money. I have no source to give money as my cows also died during the flood. Then a team from this organisation came to our village and helped us by giving groceries and other needful things. I am very thankful for their help in our needful times. I also requested the team if they could support me with a cow. The team took it to their concerned authorities. Later they came and gave me a cow. I cannot thank them enough for their big help in my life. Today my life has become blessed and I am able to earn a living through selling cow milk. Things like these should never happen to anyone. As soon as the water broke into my house, I rushed outside to see my cows. My cows were dying as there was short circuit in the water. I couldn't go near them. I carried my children on my shoulders, water was up till my neck. I reached a safer place but there was no shadow to protect ourselves from heavy rain. My children became very sick, and they started shivering too much and I thought for second that I was going to lose them. I took some leaves from the tress and somehow manged to keep my children warm. I was just praying to God for a good sign. Then a team arrived and gave me a bag full of groceries and medicines. I gave medicines for my children and after many days they got to eat good food and clean drinking water. I am very thankful for their love and care during our hard times. I requested for a cow as it can be a solution to my problems. The team took it to their notice and promised me with positive words. Later they came and gave me a cow. I am Banu, I have daughter who is only 7 years old. My husband abandoned me because I gave birth to a girl child. Initially I had to do odd jobs to feed my daughter, then I borrowed money to buy a cow. Cows were my only source of income. The flood took away my cows and I couldn't do much to save my cows. I was deeply worried thinking about our future. Then a team of rescuers came to our village, distributed flood reliefs. They gave us the most needed things that helped us get through our situation with hope. I cried out my problems to the team requesting for a cow. the team took it to their notice. later they came and gave me a cow. I felt moved by their generous support in my life. My daughter liked the cow, it looked tall and beautiful. Most of all the cow was insured and vaccinated which was a double bonus of blessing to me. Today my life has become better, and I am able to feed my daughter through the income I am earning through this cow. I have no words to express my gratitude. I will be eternally grateful to this organisation. May God bless you abundantly.
